

Step by Step

1. Wash

First, wash the hair with RG Clarifying Shampoo 2 to 3 times; assuring that the hair is completely clean and free from any residues.

2. Dry

Next, you are going to towel dry the hair making sure to leave it damp.

3. Section Hair

Now using plastic clips, divide the hair into 4 sections. After, pour product into a bowl and apply Treatment onto hair. Do not over-saturate hair for this will not render your desired results.

4. Application

Apply the product section by section using just the tip of the brush. Start from the nape of the neck. Apply the product from the back working your way to the front.

- **Back Section:** Always apply the product upwards, starting at the bottom. Separate the hair into small sections horizontally. Lightly dab the product into the hair section with an applicator brush and spread it with a fine tooth comb, combing it downwards.
- Work on each section individually by applying the product and drying it completely making it perfectly blow dried before going on to the next section.
- **Sides Sections:** As you apply, separate the hair into small sections vertically. Lightly dab the product into the hair section with an applicator brush and spread it with a fine tooth comb, and make sure to always brush it towards the back.
- Work on each section individually by applying the product and drying it completely making it perfectly blow dried before going on to the next section

Always apply the product to damp hair, if hair dries out during the process, keep a water sprayer at hand.

Footnote

It is better to use a paddle brush to dry and remove all excess product and then finish your perfect blow dry with a round brush.

5. Flat Iron and Oil Application

As you divide the hair into 4 sections once again make sure the flat iron is pre-heated at 450° F. You will start back at the first section flat ironing from the nape up sealing the hair cuticle. Always curve the ends to the inside creating a perfect finish. After the smoothing treatment is complete, it is time to apply RG Argan Oil.

Observation - You may wash your hair right after the treatment, it is not necessary to wait 2-3 days, as treatment is now complete.

Warning - Do not pin, tie, or use any sort of hair clippings for this will leave a permanent crease or wave. Do not place the sides of the hair behind the ears as well.

Follow Up - Last but not least, to ensure the longevity of your treatment and in order to maintain the desired results, use the complete maintenance care line.
